

## **DANGER**

 $\mathbf{\cdot}$ 

- DO NOT attempt somersaults or flips. Paralysis or death can result if you land on your head or neck!
- No more than one person on the trampoline at a time. Multiple users increase the risk of injury.
- Use trampoline only with mature, knowledgeable supervision.

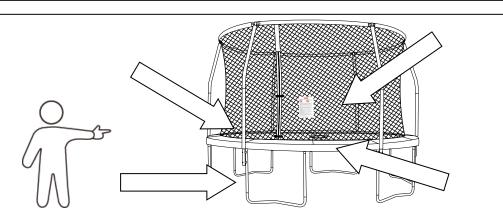

## 

- These instructions are important to minimize chances of injury. Please read each of them thoroughly before you assemble and use this trampoline. Retain this manual for future reference.
- Maximum weight of the user shall NOT exceed 220lbs/100kg for this product.

# 

Daily Pre-Inspection: >Inspect legs for proper attachment or cracks >Inspect netting for tears and sagging >Inspect for loose or damaged springs >Inspect mat for tears or worn stitching >Inspect frame for sagging or cracks

**Inspect prior to use** – check that the legs are properly attached and stable on the ground; no loose springs; mat and enclosure net are in proper place and in good condition with no tears.

Thank you for purchasing a Trainor Sports product! This trampoline was designed and manufactured with quality materials and craftsmanship, providing fun and exercise in the enjoyment of your own backyard.

It is very important that the owners and users of this trampoline have adequate knowledge of techniques and rules for proper use. In particular, children must be supervised at all times by a knowledgeable and mature adult while using the trampoline. Take precautions to prevent access to the trampoline by children when there is no adult supervision. Also restrict access to any unauthorized users without your consent.

Carefully read and understand all of the instructions and warnings in the User Manual before assembling and using this product. It is the responsibility of the owner of this trampoline to ensure that all users of this product are fully informed on the proper use and the inherent risks of jumping on a trampoline. Failure to do so can result in serious injury or death. In particular, under no circumstances should you attempt or allow flips, somersaults or any similar conduct. Landing on the head or neck can cause serious injury, paralysis, or death, even when landing in the middle of the mat. Also, do not allow more than one person on the trampoline under any circumstances. Use by more than one person at the same time increases the chance of injury.

To reduce risks associated with users falling off the trampoline, enclosure netting must be properly installed and used at all times. The trampoline enclosure must be closed during use to prevent the user from falling off the trampoline. Your trampoline enclosure netting is manufactured with UV resistant material. Despite this, exposure to harsh elements (sunlight, wind, moisture, animals, etc) will weaken the netting. The netting and mat must be inspected prior to every use and maintained regularly as detailed in this User's Manual.

Please also ensure proper placement of this product to avoid injuries. It is essential that the intended site for this trampoline is completely flat and level. If the ground is uneven, this could cause movement in the frame and stress on the joined sections of the frame that could damage the trampoline and/or can cause serious injury. Do not position this trampoline on hard surface such as concrete, tarmac or paving. Suitable surfaces include flat dirt or grass, sand or play area covered with an appropriate depth of play bark material, with no obstructions above, below or near the product.

The product must not be used in windy conditions as wind can cause unexpected movement of the product. Wind can cause the trampoline to be lifted off the ground and become airborne. This can present a danger to individuals and to property. Winds can be especially strong in open areas, foothills, mountains, locations subject to hurricanes and tornadoes, areas between homes that create wind tunnels and anywhere else where local weather conditions can create high winds. We recommend that you anchor the trampoline or otherwise secure the trampoline to prevent it from moving as a result of the wind. One possible way to anchor the trampoline is to secure the trampoline to a concrete footing under each leg. We recommend consulting a local licensed contractor to best determine how the anchor system should be constructed for your specific conditions. The licensed contractor can also advise you of other options such as below ground installation. Even with anchors, a trampoline can be lifted, just like anything else, by strong winds. If the winds are anticipated to be very strong, the trampoline should be disassembled and stored away safely until the weather conditions improve. Damage from the wind or other severe weather is not covered by the manufacturer's warranty. Because the manufacturer warranty does not cover wind or weather related damage and damage can be caused to your property or the property of others by a windblown trampoline, it is strongly advised that you provide site specific anchoring through a licensed local contractor.

Only genuine replacement parts sold through our authorized dealer are recommended. Replacement parts from other sources may not have been designed, tested or manufactured to meet our testing standards. Because of this, we cannot guarantee the performance and safety of the product when non genuine replacement parts are used. The use of non-genuine authorized replacement parts may affect any warranty claim on the product, as allowed by the law in your jurisdiction.

For additional information concerning the trampoline equipment contact Dyaco Canada Inc. at 1-888-707-1880 or write to the following address: 5955 Don Murie, Niagara Falls, Ontario L2G 0A9 or email us at: <u>customerservice@dyaco.ca</u>.

Read all instructions in this manual carefully before assembling or using this product. Keep this manual in a safe place for future reference.

#### DO NOT RETURN PRODUCT TO THE STORE. PLEASE CONTACT OUR CUSTOMER SERVICE FOR PARTS OR ASSEMBLY INSTRUCTIONS. STORES ARE NOT EQUIPPED TO PROVIDE CUSTOMER SERVICE FOR THIS PRODUCT.

Carefully read and understand all of the instructions and warnings in this manual before assembling and using this product. It is the responsibility of the owner of this trampoline to ensure that all users of this product are fully informed on the proper use and the inherent risks of jumping on a trampoline. Failure to do so can result in serious injury or death.

## Before you start to assemble...

- Check the package and make sure you have all of the parts listed in the Parts List section of this user manual. IF ANY PARTS ARE MISSING, please call the Customer Service toll-free number listed on the cover page for assistance.
- Do not assemble or use the product if any parts are missing or damaged. Store in a safe place until ready to assemble.
- Make sure that you have plenty of space and a clean dry area suitable for the assembly of this trampoline. IT IS ESSENTIAL THAT THE INTENDED SITE FOR THIS TRAMPOLINE IS COMPLETELY FLAT AND LEVEL. If the ground is uneven, this could cause movement in the frame and stress on the joined sections of the frame that could damage the trampoline and/or can cause serious injury.
- > Two adults are needed to assemble this trampoline.
- Heavy gloves must be used to protect your hands from pinch points during assembly and goggles must be worn to avoid injuries to the eyes.
- Never modify the construction or the design of the product. Do not use any unauthorized manufacturer replacement parts.
- This pack may contain small parts and is not suitable for children under six (6) years of age to be nearby during assembly.
- > **IMPORTANT:** Save this manual for future reference.

## Before using the product...

- Use of this trampoline requires constant adult supervision. Use the trampoline only with mature and knowledgeable ADULT supervision.
- Ensure that the trampoline enclosure has been assembled correctly, as per the instructions in this manual and that the zip and attachment system are fully attached before use.
- > Trampolines over 20 in. (51 cm) tall are not recommended for use by children under 6 years of age.
- > There must be no more than one person at a time on the trampoline.
- Maximum weight of the user shall NOT exceed 165lbs/75kg for this product.
- This product is for household and family domestic use only It is not for use in schools, playgrounds, rental or commercial use.

## Important Warnings

Carefully read these warnings before using this product. Failure to follow these warnings can result in serious injury or death.

## **WARNING**

- Only one user at any one time! Multiple users can cause loss of control, collision or falls on the trampoline. This could result in serious injury to legs, arms, back, neck or head.
- Do not use the trampoline when under the influence of alcohol, drugs or medication, which may impair the jumper's judgement.
- > Always consult your physician before performing any kind of physical activity.
- > Do not use the trampoline if you have high blood pressure.
- > Do not use the trampoline if you have a medical history of neck or back injuries or mental or physical conditions that could cause injury.
- > Do not use if the user has any broken bones (casts) or has recently been in the hospital for extensive treatments (operations, severe wounds, stitches, back injury or concussion).
- > Do not use without the consent of your physician, if pregnant.
- > Do not use the trampoline during windy conditions or if the user or the trampoline surface is wet. These conditions can cause the user to lose control and fall resulting in serious injury.
- Damage from the wind or other severe weather is not covered by the manufacturer's warranty. Because the manufacturer warranty does not cover wind or weather related damage and damage can be caused to your property or the property of others by a windblown trampoline, it is strongly advised that you provide site specific anchoring through a licensed local contractor.
- Do not perform somersaults or flips. This will significantly increase your chances of landing on your head or neck and can cause serious injuries, such as paralysis or death!
- Do not jump on trampoline with snow board, skateboard, roller blades, bicycle or any other equipment not authorized by the trampoline maker.
- Do not jump off walls or building onto the trampoline. Do not use the trampoline as a springboard to jump onto other objects.
- This product is intended for outdoor non-commercial use only. Do not use indoors. Do not use in any commercial, rental, professional or stunt performance setting.
- Do not jump on the trampoline mat with street shoes or tennis shoes. Users of the trampoline should not wear sharp or pointed objects and should not bring any sharp or pointed objects into the trampoline or the area around the trampoline. Any type of sharp or pointed objects should be removed from persons and kept off the trampoline at all times. Remove all buckles, jewelry, and other sharp or pointed objects.
- > Do not allow any pets onto the mat in order to prevent the trampoline mat from being damaged
- > Do not allow any pets or children to go under the jump mat.
- Always inspect the trampoline before each use for worn-out mats or enclosures and loose or missing parts. Make sure the frame padding is correctly and securely positioned. Replace defective components immediately and/or keep the equipment out of use until repair.
- Always protect enclosure net from extreme temperatures. Extreme temperatures may damage components and cause them to tear and cause injury.
- Always make sure that the trampoline enclosure netting is installed and used properly at all times. The trampoline enclosure should be closed during use to prevent the user from falling off of the trampoline.
- Always climb on and off the trampoline while mounting or dismounting. Do not jump on or off the trampoline as this can cause serious injuries.
- Always properly store away the trampoline and enclosure when not in use and secure from any unauthorized use. Trampoline should be taken down and stored away during harsh weather conditions including extreme heat and snow or freezing temperature.
- > Always use the trampoline wearing comfortable clothes and socks or barefoot

## Carefully read these warnings before using this product. Failure to follow these safety instructions can result in serious injury or death.

#### **Proper Play Conditions:**

- Always use the product in a well-lit area. Do not use without lighting during dawn, dusk or in complete darkness!
- The trampoline must be placed on a surface that is COMPLETELY FLAT AND LEVEL. If the ground is uneven, this could cause movement in the frame and could cause stress on the joined sections of the frame that could damage the trampoline and/or can cause serious injury.
- > DO NOT install or position this trampoline on a hard surface such as concrete, tarmac or paving. Suitable surfaces are grass, sand or a play area covered with an appropriate depth of play bark material.
- Maintain clear space on all sides of the product. Make sure that there are no hazardous objects above, below or near the trampoline. Such objects include walls, fences, tree limbs/trunks, electrical power wiring, rocks, sprinkler heads or other recreational objects (i.e. swing sets, swimming pools). Children can be seriously injured by colliding with such obstacles.
- Adequate overhead clearance is essential. A minimum of 24 ft (7.3 meters) from ground level is recommended. Provide clearance for wires, tree limbs, and other possible hazards.
- > Do not use the trampoline indoors, as this product is intended for outdoor home use only.
- The product must not be used in windy conditions as wind can cause unexpected movement of the product. Wind can cause the trampoline to be lifted off the ground and become airborne. This can present a danger to individuals and to property. Winds can be especially strong in open areas, foothills, mountains, locations subject to hurricanes and tornadoes, areas between homes that create wind tunnels and anywhere else where local weather conditions can create high winds. We recommend that you anchor the trampoline or otherwise secure the trampoline to prevent it from moving as a result of the wind. One possible way to anchor the trampoline is to secure the trampoline to a concrete footing under each leg. We recommend consulting a local licensed contractor to best determine how the anchor system should be constructed for your specific conditions. The licensed contractor can also advise you of other options such as below ground installation. Even with anchors, a trampoline can be lifted, just like anything else, by strong winds. If the winds are anticipated to be very strong, the trampoline should be disassembled and stored away safely until the weather conditions improve. Damage from the wind or other severe weather is not covered by the manufacturer's warranty.

## Carefully read these warnings before using this product. Failure to follow these safety instructions can result in serious injury or death.

#### Appropriate Use Conditions:

- Children must always be supervised while they are playing on the trampoline and must be instructed not to use the trampoline in an inappropriate or hazardous manner. Take precautions to prevent access to the trampoline by children when there is no adult supervision.
- > Restrict access to the trampoline by any unauthorized users without your consent.
- Trampolines are rebounding devices, which propel the user to unaccustomed heights, and into a variety of body movements. Rebounding off of the trampoline, striking the frame or springs, or improperly landing on the trampoline mat may cause serious injury.
- Always start and maintain your jump at the center of the trampoline mat in order to reduce the risk of landing on the frame or springs or falling off the trampoline.
- Avoid bouncing too high. Stay low until you can control your bounce and land consistently in the middle of the trampoline mat.
- Ensure the trampoline frame and springs are fully covered by the frame pad to avoid any direct contact with metal parts.
- Do not stand or jump on the springs while using the trampoline. The springs are not designed to support such stress and weight. This can result in serious injuries and/or product damage. If you see any signs of stretched or damaged springs, do not use the trampoline until replacement springs are properly installed. Please contact our customer service representatives to order original manufacturer replacement parts.
- The trampoline is several feet off the ground. Jumping off the trampoline to the ground or any other surface may result in injury. Smaller children may need assistance getting up onto or down from the trampoline. Mounting and dismounting properly should be followed as a strict rule. Users should climb onto the trampoline by placing their hands on the frame and stepping or rolling up onto the frame, across the springs and onto the mat. Do not step directly on the frame pad or grasp the frame pad when mounting or dismounting the trampoline. To dismount, jumpers should walk to the side of the mat, bend over and place their hands on the frame, then step from the mat to the ground. Users should always place their hands on the frame while mounting or dismounting.
- > Do NOT use the trampoline as a springboard to jump onto other objects.
- Remove all objects not designed for use with the trampoline from the trampoline before use. Do not let children take toys or other items onto the trampoline.

Carefully read these warnings before using this product. Failure to follow these safety instructions can result in serious injury or death.

## **WARNING**

- > Do not jump or step onto the frame pad as it was not designed to support the weight of a person.
- Do not use the trampoline while holding or wearing any type of sharp or pointed objects such as jewelry, watches, rings, eyewear and necklaces before using this product. This will prevent the jewelry from tearing the mat or getting caught in the enclosure netting.
- > Do not wear loose fitting clothing that may catch or snag during play.
- Never wear footwear (e.g. shoes) when using the trampoline.
- > Always tie back long hair so that it does not block user's vision or get caught in the enclosure netting.
- FRAME PADS Frame pads are there to protect user from any fall or landing on the springs and frame. On no account should people be permitted to sit or stand on them when the trampoline is in use. You should also make sure that smaller users do not use the inside edges of the pads as a "handle" when getting up on to the trampoline.
- Never use the trampoline without the frame pad being securely attached. Properly tie down the frame pad before each use. Improper assembly of the frame pad may lead to injury!
- Always check to ensure there are no obstructions or objects under the trampoline that could cause injury or obstruct movement of jump mat. Also check that there are no pets or other people underneath the trampoline.
- Do not jump on the trampoline with a snowboard, skateboard, roller blades, bicycle or any other equipment. DO NOT hold any foreign objects not authorized by the manufacturer in your hand and DO NOT place any objects on the trampoline while anyone is jumping on it. Please be aware of your surroundings to ensure there are no objects that could cause harm when you are playing on the trampoline.
- The frame of your trampoline is made of steel and it will conduct electricity. No electrical equipment (lights, heaters, extension cords, household appliances, etc.) should be permitted in or on the enclosure under any circumstances to avoid the risk of electrocution.

### Enclosure Netting and Mat – Appropriate Use Conditions

- > Children MUST NEVER be left unattended inside the enclosure at any time.
- The enclosure is ONLY intended to be used to reduce the risk of injury from falling off the trampoline. Do not intentionally kick, bounce against, climb on, hang from, jump over or crawl under the netting.
- Enter and exit the enclosure only through the zipper door. Do not go through the gap between the netting and the mat. Trying to exit this way poses a risk of strangulation, especially for young children.
- The enclosure netting and mat must be inspected prior to each use. If there are any signs of weakness, you must stop using the trampoline immediately, properly store the trampoline and restrict access by users until authorized replacement netting or pad is installed. Please refer to the Trampoline Net & Pad Maintenance Requirements section contained in this manual for further details.

## Important Instructions for Enclosure Netting and Mat

Failure to follow these instructions to ensure proper operational condition of your trampoline may lead to serious injury or death.

### 1. Maintenance of Trampoline Enclosure Net, Mat and Pad

Enclosure nets and padding are prone to wear and tear like tires on a car. Gradual deterioration of the material will occur; the speed of which will depend on the level of exposure to UV rays, airborne pollution and outdoor weather conditions such as rain and wind.

The net and padding needs to be properly maintained and checked by following the Maintenance Schedule set out in these instructions. When the material shows any signs of weakness, you must stop using the trampoline immediately, properly store the trampoline and restrict access by users until a new replacement net or padding is properly installed.

Walk around the whole perimeter of the trampoline to visually check for material deterioration, tears, looseness, loss of elasticity or other damage in the pad.

Official replacement nets and padding can be purchased by contacting our authorized customer service by toll free number or email us at: <a href="mailto:customerservice@dyaco.ca">customerservice@dyaco.ca</a>.

### 2. Maintenance Requirement for Enclosure Net

Your trampoline enclosure netting is manufactured with UV resistant material. Despite this the netting is exposed to the outdoor elements including sunlight, wind, rain and wildlife. The net surrounding the trampoline must be checked prior to each use. This includes, but is not limited to inspecting the net for cracks, excess wear, brittleness, and stretching. Also inspect all connections and the entire enclosure for overall integrity. The net must be immediately replaced if it shows any signs of wear, damage, stretching, cracking, looseness, brittleness or other losses in integrity. The following Maintenance Schedule must be followed:

1 to 3 Months	3 to 6 Months	6 to 12 Months
Inspect the enclosure (net, net hanger, and straps) prior to every use.	Thorough inspection for UV damage and prior to every use for net, net hanger and straps.	Thorough inspection before every use on net, net hanger, straps, zippers, ties and strings. Replace after 12 months or earlier if necessary.

## IT IS RECOMMENDED THAT THE NET BE REPLACED ON A YEARLY BASIS UNDER NORMAL USE, EVEN IF IT DOES NOT SHOW ANY VISIBLE SIGNS OF DAMAGE.

#### SAFETY TIPS FOR TRAMPOLINE NET

Do not attempt to jump over or crawl under the netting.

Do not intentionally bounce off the netting.

Do not hang from, kick, cut or climb on the netting.

Wear clothing free of drawstrings, hooks, loops or anything that could get caught in the netting. Do not attach anything to the netting that is not a manufacturer-approved accessory or part of the enclosure system.

Enter and exit the enclosure only at the enclosure door or netting opening designated for that purpose.

A trampoline enclosure installed on a trampoline is raised off the ground. The height of the enclosure increases the risk of a fall when a jumper is entering or exiting the enclosure. Young children in particular may have difficulty getting into and out of the enclosure. To reduce the risk of falling, help young children to get into and out of the enclosure.

Enter and exit the trampoline enclosure only through the opening of the enclosure (the opening in the netting walls). The trampoline mat and nettings walls of the enclosure are separate pieces; jumpers, particularly young children, must not exit the enclosure by going out between the mat and the netting walls. Trying to exit in this way poses a risk of strangulation from being caught between the trampoline frame and the netting walls.

Do not attach anything to the netting that is not a Trainor Sports approved accessory or part of the trampoline enclosure.

### 3. Maintenance Requirement for Trampoline Pad

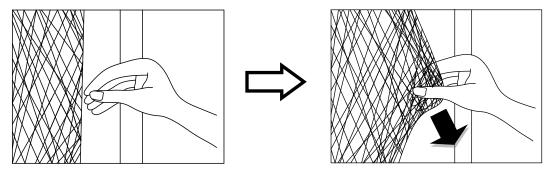

Walk around the whole perimeter of the trampoline to visually check for material deterioration, tears, loss of elasticity or other damage in the pad.

It is recommended that you replace the trampoline enclosure net and pad every 12 months. Replace the enclosure net and pad earlier if there are any signs of wear, tear, brittleness, cracking, stretching or any other signs of weakness. New enclosure netting and pad can be purchased through our customer service department.

## How to Inspect the Trampoline Net for Proper Use

Always check the enclosure netting for signs of UV damage, deterioration, brittleness, cracking, and tearing every time before using the trampoline and enclosure.

Step 1 - Inspect the enclosure netting before **EACH** use for wear or tear by pinching and pulling a section of the netting between fingers and pulling downward. Please see diagram below.

If it produces any tear or cracking or ripping sound, then the net is unsafe and MUST be taken down immediately. **STOP USING THE TRAMPOLINE ENCLOSURE IF YOU FIND ANY SIGNS OF WEAR OR TEARING ON THE NETTING.** 

Step 2 - Walk around the whole perimeter of the trampoline to visually check for material deterioration or other damage.

## SAFETY TIPS FOR TRAMPOLINE NET

Do not attempt to jump over or crawl under the netting.

Do not intentionally bounce off the netting.

Do not hang from, kick, cut or climb on the netting.

Wear clothing free of drawstrings, hooks, loops or anything that could get caught in the netting. Do not attach anything to the netting that is not a manufacturer-approved accessory or part of the enclosure system.

Enter and exit the enclosure only at the enclosure door or netting opening designated for that purpose.

A trampoline enclosure installed on a trampoline is raised off the ground. The height of the enclosure increases the risk of a fall when a jumper is entering or exiting the enclosure. Young children in particular may have difficulty getting into and out of the enclosure. To reduce the risk of falling, help young children to get into and out of the enclosure.

Enter and exit the trampoline enclosure only through the opening of the enclosure (the opening in the netting walls). The trampoline mat and nettings walls of the enclosure are separate pieces; jumpers, particularly young children, must not exit the enclosure by going out between the mat and the netting walls. Trying to exit in this way poses a risk of strangulation from being caught between the trampoline frame and the netting walls.

Do not attach anything to the netting that is not a Trainor Sports approved accessory or part of the trampoline enclosure.

## 3. Maintenance Requirement for Trampoline Pad

Walk around the whole perimeter of the trampoline to visually check for material deterioration, tears, loss of elasticity or other damage in the pad.

## It is recommended that you replace the trampoline enclosure net and pad every 12 months. Replace the enclosure net and pad earlier if there are any signs of wear, tear, brittleness, cracking, stretching or any other signs of weakness. New enclosure netting and pad can be purchased through our customer service department.

## Assembly and Installation Instructions

Review all steps before assembly and read all precautions before using this product. Failure to do so can result in serious injury or death.

During periods of non-use, this trampoline and trampoline enclosure can be easily disassembled and stored by reversing the order of installation.

## **WARNING**

- At least two people are required to assemble the trampoline and trampoline enclosure.
- Protective gloves must be used during assembly to avoid injuries during installation.
- Protective goggles must be worn to avoid injuries to the eyes.

For appropriate use of the trampoline, please assemble the trampoline in a location that meets the following conditions:

- Adequate overhead clearance is needed. A minimum of 24 ft (7.3 meters) from ground level is recommended. Provide clearance for wires, tree limbs and other possible hazards.
- Lateral clearance is essential. Place the trampoline away from walls, structures, fences and other play areas. Maintain a clear space on all sides of the trampoline.
- Place the trampoline on a flat and level surface before use.
- Do not install this trampoline on hard surfaces. Suitable surfaces include grass or sand.
- Use the trampoline in a well-lit area. Artificial illumination may be required for shady areas.
- The trampoline should be installed in an area where access can be restricted from unauthorized and unsupervised use.
- Ensure there is nothing beneath the trampoline that could cause injury or obstruct movement of jump mat.
- Remove any obstructions from beneath the trampoline.
- The trampoline enclosure is only to be used as an enclosure for a trampoline of a size for which the enclosure is designed.
- The owner and supervisors of the trampoline are responsible to make all users aware of practices specified in the use instructions section.
- Users may become entangled in or strangled by loose cords or in gaps between trampoline and enclosure. Keep enclosure tightly fastened to the trampoline in accordance with the manufacturer's instructions. Failure to properly assemble and maintain a tight, secure trampoline/enclosure boundary may result in serious injury, strangulation, or death.

If you do not follow these guidelines, you increase the risk of injury or death.

## PRIOR TO ASSEMBLING

Before assembly, please ensure that you have all the parts required to assemble the product. If you are missing any parts, please contact our Customer Support agents.

## NOTICE

- Please do not use unauthorized parts to assemble the trampoline. This may damage the integrity of the product and will void the manufacturer's warranty.
- DO NOT use electric power tools to tighten or loosen bolts and screws as this can damage the hardware.

## Trampoline Frame Assembly

**BEFORE YOU BEGIN:** Review all steps before assembly and read all precautions before using the trampoline. At least two adults are required to assemble this trampoline. Protective gloves should be used during assembly to avoid injuries during installation. Goggles should be worn to avoid injuries to the eyes.

#### Step 1 – Layout Trampoline Frame Parts

Locate the following 30 pieces of steel tubing parts that are needed to assemble the trampoline frame:

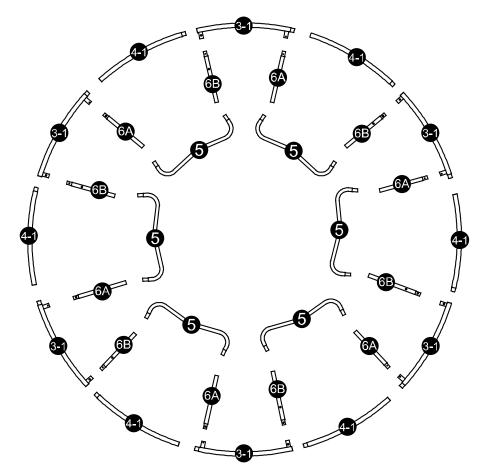

6-Top Rail with Leg Sockets (# 3-1)
6-Top Rails (# 4-1)
6-Leg Bases (# 5)
6-Vertical Leg Extensions with one (1) hole (# 6A)
6-Vertical Leg Extensions with two (2) holes (# 6B)

Lay out all parts on dry flat surface as shown below.

Note: All parts with the same number are interchangeable and have no "right" or "left" orientation.

## **WARNING**

Make sure that you have plenty of space and a clean dry area suitable for the assembly of this trampoline. IT **IS ESSENTIAL THAT THE INTENDED SITE FOR THIS TRAMPOLINE IS COMPLETELY FLAT AND LEVEL.** If the ground is uneven this could cause movement in the frame and could cause stress on the joined sections of the frame that could damage the trampoline and/or can cause serious injury.

### Step 2 – Leg Support and Top Rail with Leg Socket Assembly

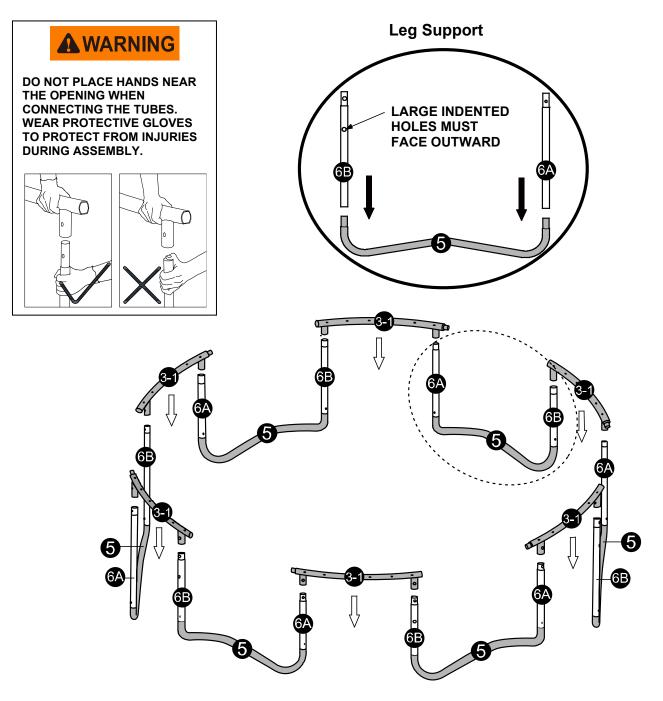

At this point, two people will be needed to assemble the trampoline.

Connect Vertical Leg Extensions (# 6A and # 6B) to Leg Base (# 5) as shown below (the assembled parts will be hereinafter referred to as "Leg Support").

Note: Make sure the indented hole on # 6B is facing outward.

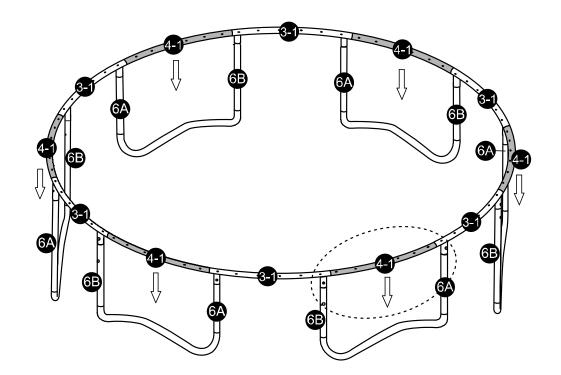

Lift two sets of the assembled Leg Supports to a vertical (standing) position. Connect one end of the Top Rail with Leg Socket (# 3-1) to Vertical Leg Extension with one hole (# 6A) and the other side to Vertical Leg Extension with 2 holes(# 6B) as shown below. Repeat in the same manner to assemble all Leg Supports.

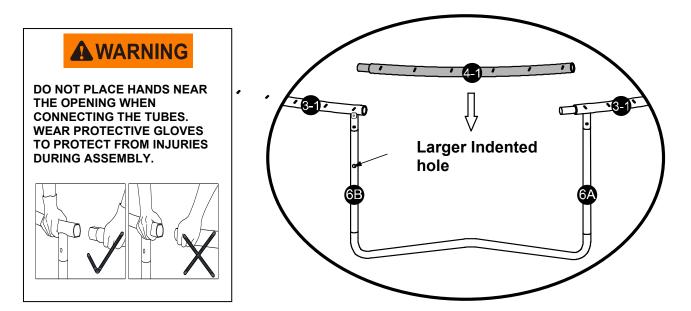

**Hint:** Make sure the holes on all the steel tubing parts are aligned and facing outward. This is important for installing the enclosure later.

#### Step 3 – Top Rail Assembly

Complete the trampoline frame by inserting all Top Rails (# 4-1) into Top Rail with Leg Sockets (# 3-1) as shown below.

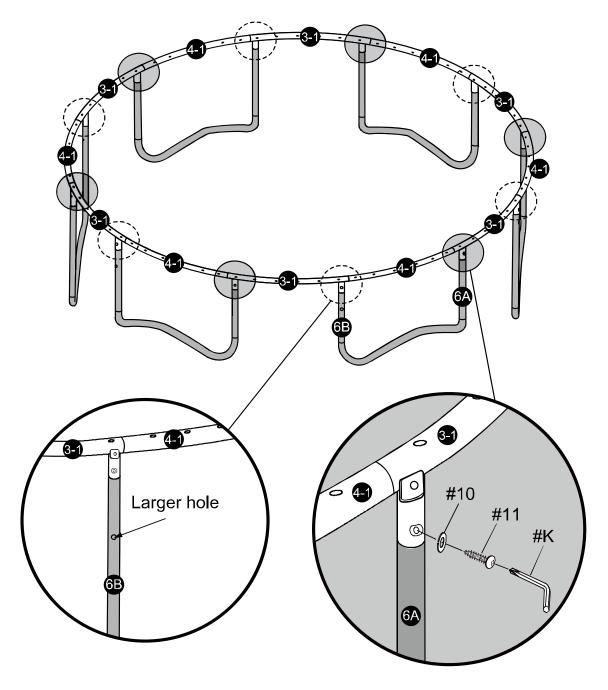

#### Step 4 –Secure the Leg Support to the Top Rail

Secure one side of the Leg Support – the Vertical Leg Extension one hole (# 6A), to the frame using Self-Locking Screw (# 11), Small Spring Lock Washer (# 10) and Allen Wrench (# K) as shown below. If the holes do not match up, rotate the Vertical Leg Extension back and forth until the holes are aligned. Repeat in the same manner for all the Leg Supports.

#### NOTE:

- The holes on the other side of the Leg Support will be used later when installing the enclosure netting.
- Do not over-tighten the screws at this point. The screws should only be tightened all the way after all the springs have been installed in later steps.

**Hint:** Make sure the holes on all the steel tubing parts are aligned and the indented hole on #6B is facing outward. This is important for installing the enclosure later.

### TRAMPOLINE MAT ASSEMBLY

## Trampoline Mat Assembly

To assemble the trampoline mat, you will only need the Spring Loading Tool (# 9) provided with this product.

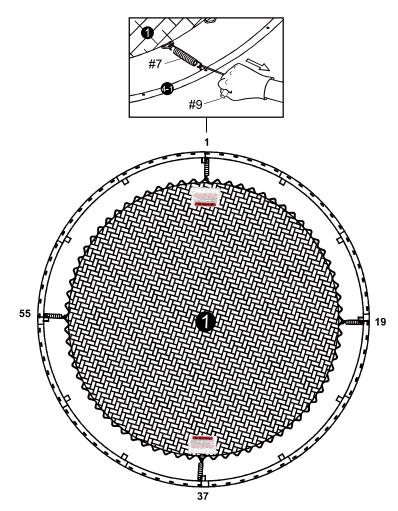

When attaching the springs, do not place your hands, arms, legs or any other body part close to the connector points (i.e. joints connecting the steel tubes). The connector points can become pinch points as the trampoline springs tighten up. Wear heavy duty working gloves to protect your hands from injuries during installation by the springs and protective goggles to avoid injuries to the eyes. Be steady when installing the springs as it can rebound and fly off if you inadvertently let go when not hooked properly. Make sure no children are playing nearby when installing the trampoline.

#### Step 5 – Mat Placement

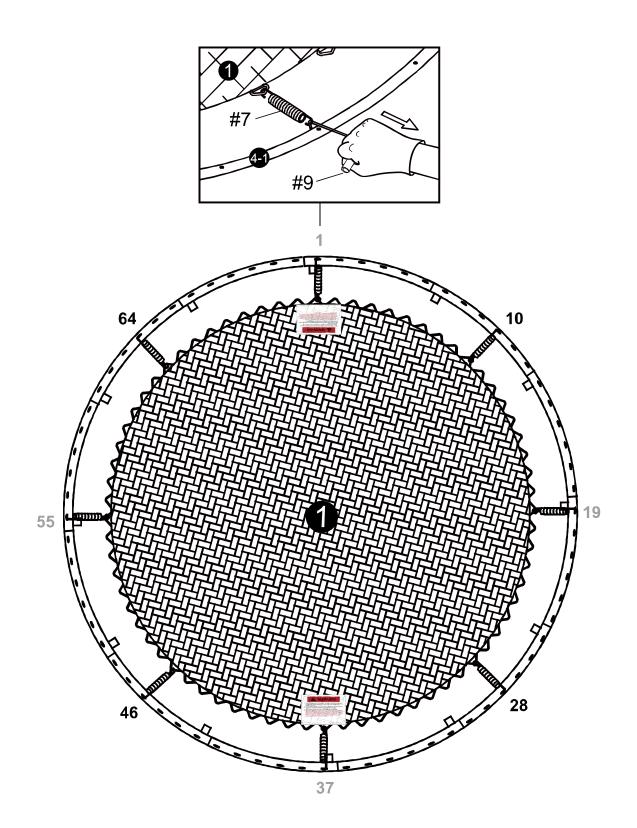

Place the Trampoline Mat (# 1) flat on the ground inside the assembled frame with the warning labels facing up as shown in FIGURE 6. Line up the warning labels with any of the trampoline legs and make sure the warning labels are facing up. This will make the installation process easier.

There are a total of 72 springs, For even distribution of spring tension and ease of assembly, the springs must always be installed on opposite sides of the mat in an alternating manner, i.e. 1, then 37, followed by 19 and 55 as shown below. Hint: The number of triangle-rings sewn onto the Mat is equal to the number of holes on the frame. If you notice that you have miscounted a hole or triangle-ring, remove and reinstall the springs as necessary while maintaining an even distribution of tension as explained above.

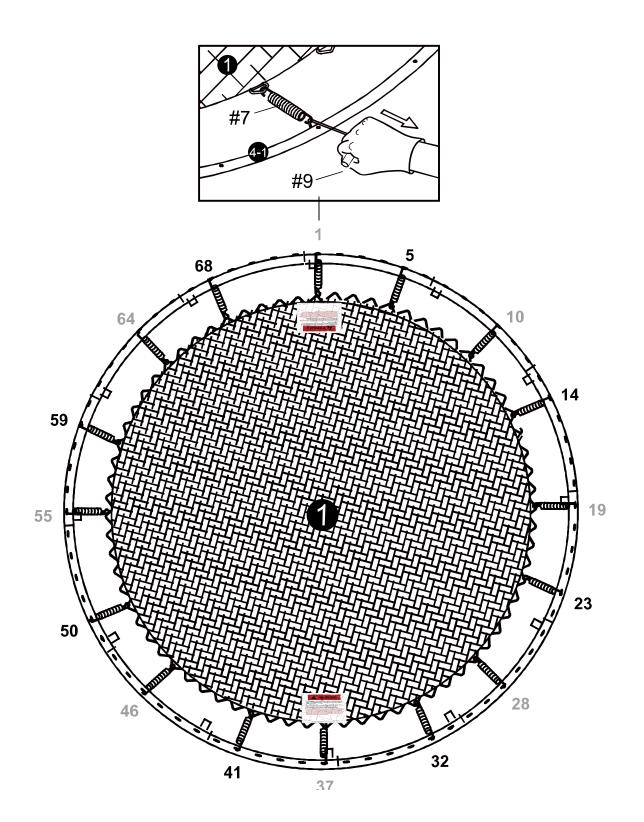

#### Step 6 – Spring Assembly

Attach a spring at every 9th hole interval. For even distribution of tension and ease of assembly, the springs must be placed on opposite sides of the mat in an alternating manner, i.e. 10 then 46, 28 then 64, etc. In addition to the previously installed springs, you should now have springs at 10, 28, 46 and 64 as shown below.

#### Step 7 – Spring Assembly

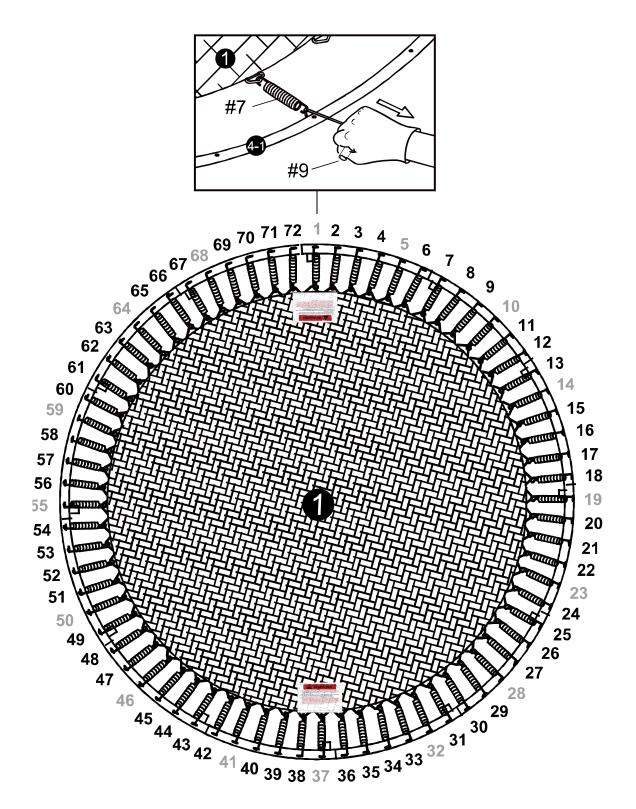

Continue to attach springs in the same manner. For even distribution of tension and ease of assembly, the springs must be placed on opposite sides of the mat in an alternating manner, i.e. 5 then 41, 14 then 50, 23 then 59, 32 then 68, etc. In addition to the previously installed springs, you should now have springs at 5, 14, 23, 32, 41, 50, 59 and 68 as shown below.

#### Step 8 – Spring Assembly

Continue to attach the remaining 56 springs in the same manner as the previous step, i.e. the springs must be placed on opposite sides of the mat in an alternating manner to ensure even distribution of tension.

**IMPORTANT:** Once all the springs are properly installed, you must go back to Step 4 and now tighten all the screws on the Leg Supports.

19

## Frame Pad Assembly

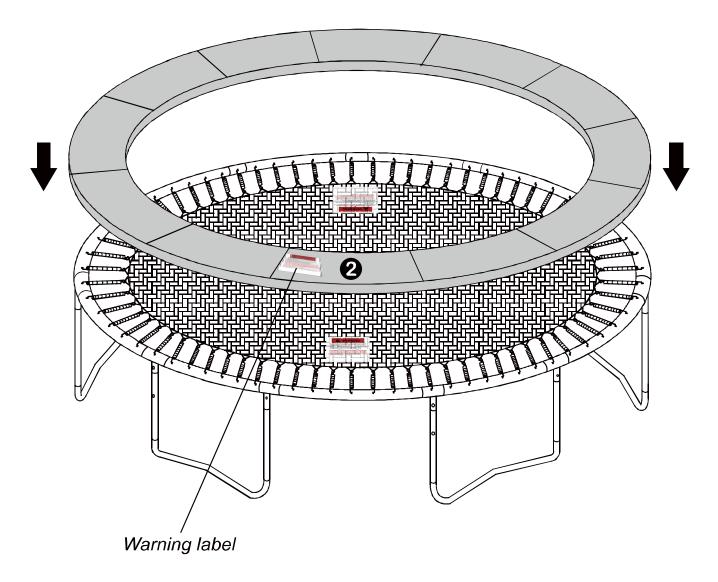

Never use the trampoline without the frame pad, the frame pad reduces the risk of getting injured by hitting the metal frame or springs. Inspect the frame pad before each and every use to ensure all exposed metal parts are fully covered by the frame pad!

#### Step 9

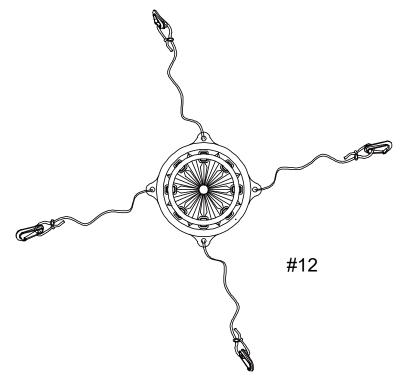

Lay Frame Pad (# 2) over the trampoline so that the springs and steel frame are fully covered as shown below.

**Note**: Please make sure the warning label on the frame pad is positioned next to a Leg Support as shown below. This is to ensure that the label is located in front of the enclosure entrance.

## Flash LiteZone Assembly

The Flash LiteZone is a trampoline accessory which is installed underneath the trampoline mat. It flashes a bright light on every bounce to help guide the user to the center of the mat.

## 

Protective gloves should be used during assembly to avoid injuries during installation and protective goggles should be worn to avoid injuries to the eyes

Ensure that no one is jumping on the trampoline while the Flash LiteZone is being installed as this will increase the chances of injury sustained by the installer.

**WARNING!** The bungee cord can snap back with force when not handled with care and can cause serious injuries. When attaching the bungee cord to the trampoline, you must hold the cord tightly and not let go until the hook is fastened securely onto the ring.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

**Caution:** changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

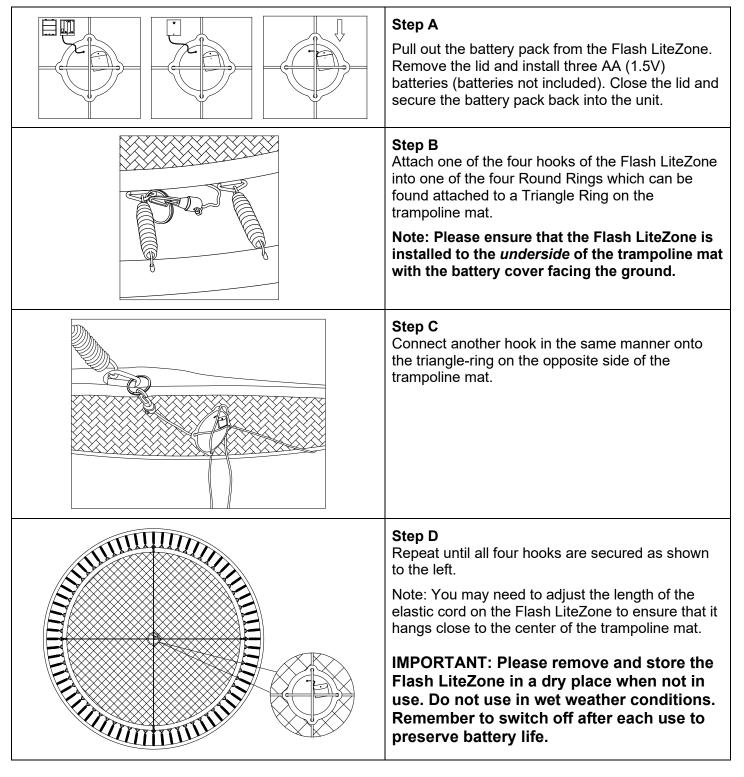

#### FLASH LITEZONE ASSEMBLY

Protective gloves should be used during assembly to avoid injuries during installation and protective goggles should be worn to avoid injuries to the eyes.

Ensure that no one is jumping on the trampoline while the Flash LiteZone is being installed as this will increase the chances of injury sustained by the installer.

**WARNING!** The bungee cord can snap back with force when not handled with care and can cause serious injuries. When attaching the bungee cord to the trampoline, you must hold the cord tightly and not let go until the hook is fastened securely onto the ring.

## Trampoline Enclosure Assembly

#### **BEFORE YOU BEGIN:**

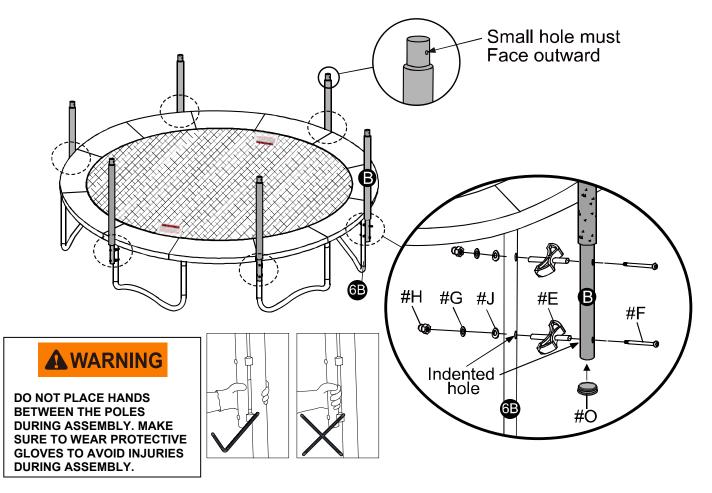

- This trampoline must only be used when the enclosure netting is properly assembled. The trampoline netting must be checked thoroughly before each use to ensure there are no tears or damages. Please carefully read all the Important Warnings contained in this manual and all warnings on the product before use.
- Review all steps before assembly and read all precautions before using the trampoline. At least two adults are required to assemble this trampoline enclosure. Protective gloves must be used during assembly to avoid injuries during installation and goggles must be worn to avoid injuries to the eyes.

#### Step 10 – Assemble the Enclosure Poles

- > Attach End Cap (# O) to the Lower Frame Tube with Foam (# B) the side with the larger opening.
- Place Gap Spacer (# E) in between Lower Frame Tube with Foam (# B) and Vertical Leg Extension with 2 holes (#6B and secure them together using Bolt (# F), Arc Washer (# J), Large Spring Lock Washer (# G) and Cap Nut (# H) in the order shown below. Repeat this step for all the frame tubes.

#### **IMPORTANT:**

- The smaller arc of Gap Spacer (# E) must face the Lower Frame Tube with Foam (# B).
- The indented holes on #6B and #B must face toward each other in order to fit the gap spacer.
- Make sure the small hole at the top of #B is facing outward. This will be used for connection to Upper Frame Tube with Foam (# A1) at a later step.
- There may be some deformation of the foam on the enclosure tubes due to compression during transport. This is normal and the shape of the foam should recover naturally over time.

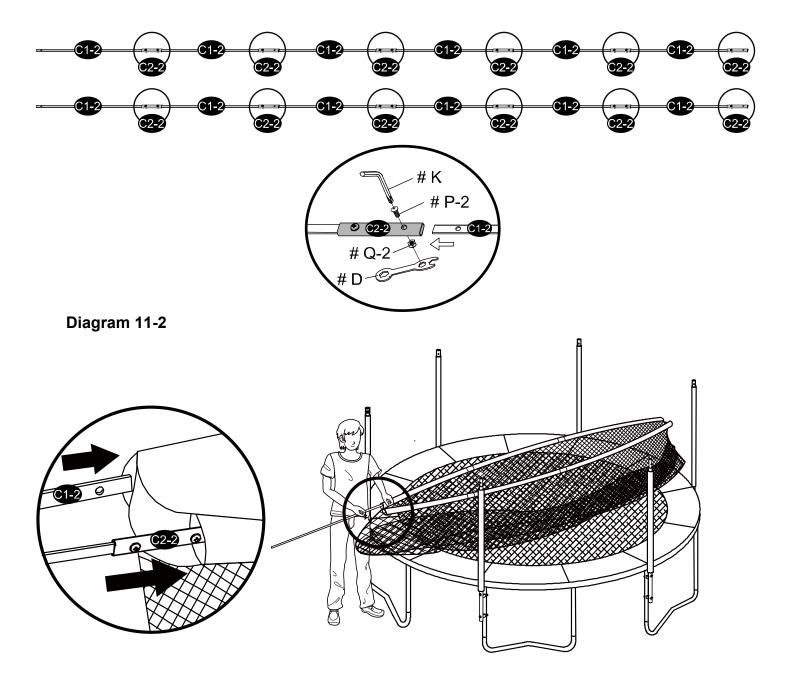

### Step 11 – Assemble the Enclosure Top Frame

- There are twelve Flat Steel (# C1-2) that need to be connected Flat Steel Sockets (# C2-2) to form the enclosure top frame and secure them together using Bolt (# P-2), Cap Nut (# Q-2), Allen Wrench (# K) and Wrench (# D).
- Insert the two sets of assembled Flat Steel into the sleeve at the top of Enclosure Netting (# M) as shown below. See Enlarged Diagram on both ends of connection.

## **WARNING**

Please make sure to securely fasten the Flat Steel together. Failing to do so may increase the chance of injury due to the enclosure frame snapping apart during assembly or trampoline use.

## Diagram 11-1

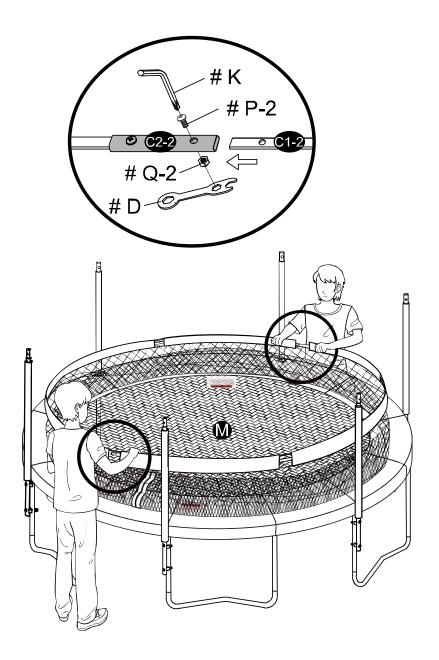

## Three adults are needed for this step. Please ensure the assembled Flat Steel Sockets are held firmly during assembly to avoid them flexing back and causing injury.

With two people firmly holding the ends of the assembled Flat Steel (# C1-2), push inward to form a circle. Connect the ends of the Flat Steel Sockets (# C2-2), align the holes secure with using Bolt (# P-2), Cap Nut (# Q-2), Allen Wrench (# K) and Wrench (# D) as shown below. This should be done by the third person while the other two people are firmly holding the ends of the tubes in place.

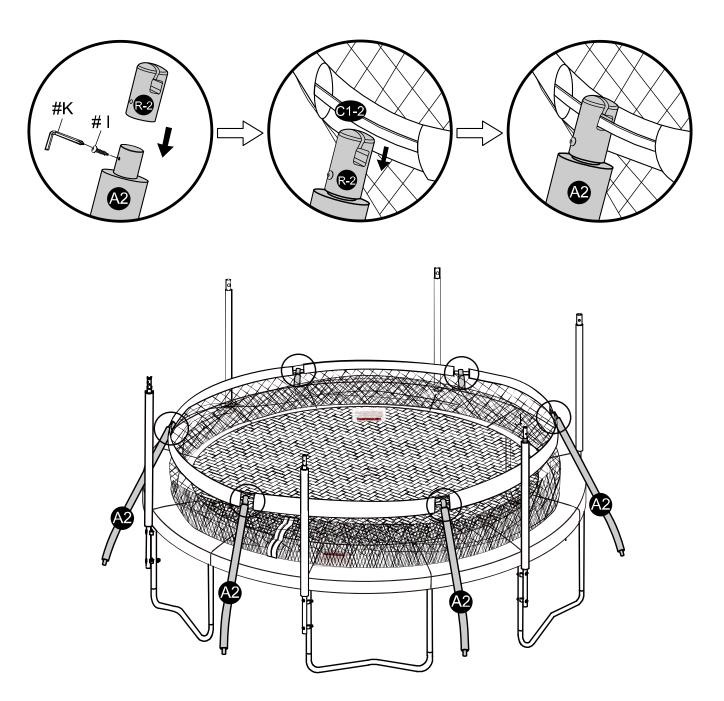

**NOTE:** Once the enclosure top frame is assembled, make sure the connection points are covered by the enclosure sleeve.

## Diagram 11-3

#### Step 12 – Attach the Enclosure Netting to the Enclosure Top Frame

- Attach Plastic Cap (# R-2) to the curved end of Upper Frame Tube with Foam (# A2), Secure with Self-Locking Screw (# I) and tightening using Allen Wrench (# K).
- Attach the assembled Plastic Cap (# R-2) to the Flat Steel (# C1-2) as shown below. Repeat in the same manner for all of the Flat Steel.

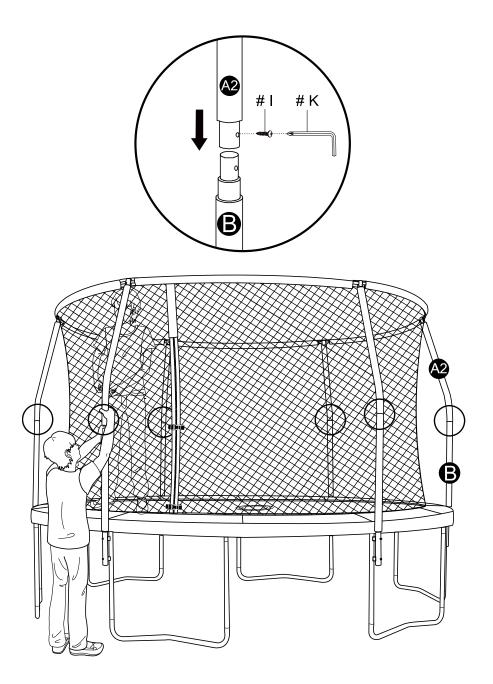

#### Step 13 – Connect the Enclosure Upper Frame to the Lower Frame

Connect all six Upper Frame Tube with Foam (# A2) to Lower Frame Tube with Foam (# B). Secure with Self-Locking Screw (# I) using Allen Wrench (# K) as shown below.

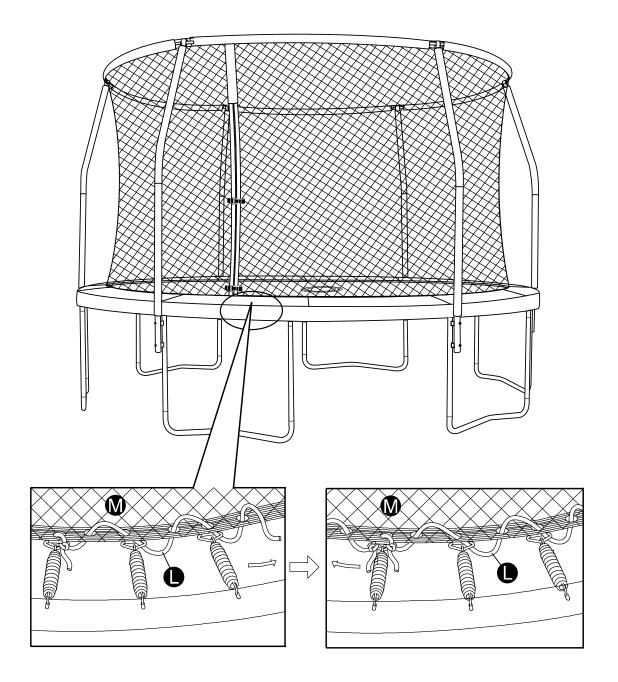

**Helpful Tips:** One person should stand inside the trampoline to hold the netting in place while another person installs all the frame tubes from the outside.

**NOTE:** Make sure the enclosure is assembled so that the entrance is aligned with the warning label on the frame padding.

#### Step 14 – Tie the Enclosure to the Mat

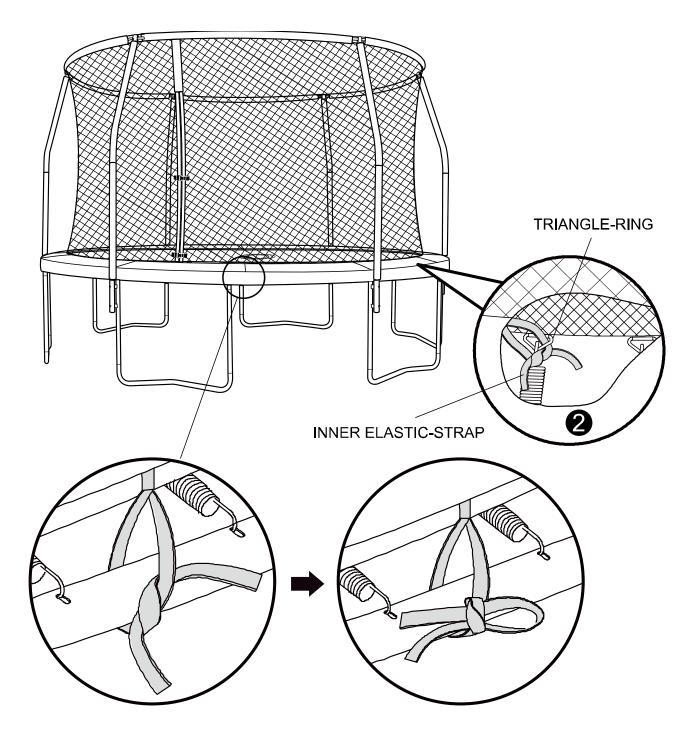

- Secure the trampoline netting to the trampoline frame using Cords (# M). Lift up the frame pad and tie one end of the cord to any one of the Triangle-Rings on the trampoline mat as shown below.
- Loop the other end of the cord through the next hole on the mat and then the adjacent triangle-ring. Continue in the same manner until you have reached the end of the cord, then tie the end with another cord. Repeat the same process for all the cords provided until the enclosure netting is fully secured to the trampoline mat.

### Step 15 – Tie the Trampoline Pad

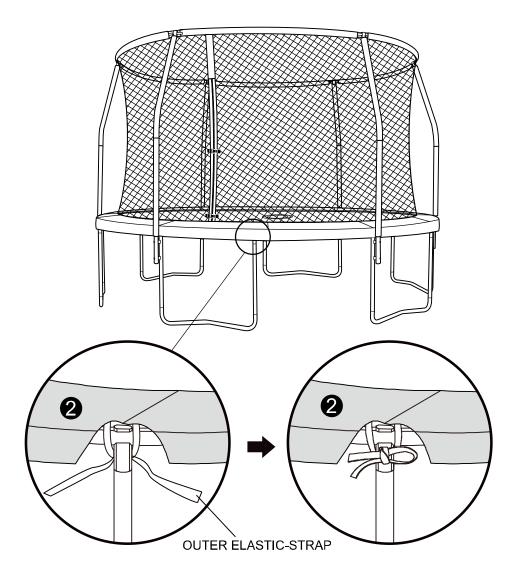

Wrap and tie the inner elastic straps around the triangle-ring and the outer straps around the trampoline frame as shown below.

## Diagram 15-1

For the elastic straps near the leg sockets, wrap them BEHIND the leg sockets and then tie a one-sided bow in front as shown below.

## Diagram 15-2

## **WARNING**

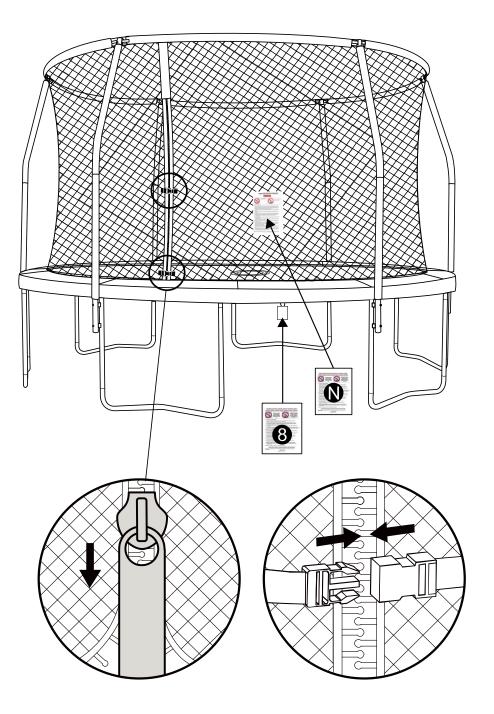

- Make sure that the knots and bows are tight for all elastic straps.
- Make sure the Frame Pad is securely attached to the frame and completely covers the frame and all of the springs before using this trampoline. Do not use the trampoline if even one spring or triangle-ring is damaged or missing.
- Perform a complete inspection of the trampoline to ensure all parts are assembled and attached properly.
- Read this entire manual and make sure all jumpers completely understand all of the warnings printed in the manual and on the various warning signs. Instruct all jumpers on the basic bounces described in the manual.

#### Step 16 – Closing the Enclosure

- Close the zipper which is located at the entrance of the Enclosure Netting (# M) and secure the entrance by connecting the hooks into the Triangle-Rings as shown below.
- Attach Trampoline Enclosure Safety Instruction Placard (# N) and Trampoline Safety Instruction Placard (# 8) to the Enclosure Netting and the Top Rails.

## **WARNING**

The zipper and buckles should be closed during use to avoid users falling out of the trampoline, as well as during periods of non-use to restrict access by unauthorized users.

Once you have finished the assembly of the trampoline, go back over all of the nuts and bolts and properly tighten all of them before using.

Read this entire manual and make sure all jumpers completely understand all of the safety rules printed in the manual and on the various warning signs. Instruct all jumpers in the basic bounces described in the manual.

CARE AND MAINTENANCE AND USE INSTRUCTIONS MUST BE READ CAREFULLY BEFORE USING THE TRAMPOLINE. ADULT SUPERVISION IS REQUIRED AT ALL TIMES

### **Disassembly of the Trampoline and Enclosure**

If you need to disassemble the trampoline, please follow the assembly instructions in reverse and take special care to retain all parts. Retain the original packaging for transport purposes.

Do not attempt to disassemble any frame components until all of the springs and the trampoline mat have been removed. Wear heavy duty working gloves to protect your hands from injuries during installation by the springs and protective goggles to avoid injuries to the eyes.

## Moving the Trampoline and Enclosure

To move the trampoline, it is recommended for the trampoline to be disassembled and then reassembled in the new location. However, if you need to move the trampoline a short distance for any reason, you must use duct tape or heavy industry tape to tape all leg joints together. To move the trampoline requires two or more people to lift the trampoline from contact with the ground. Do not drag the trampoline along the ground. The trampoline must be kept steady and horizontal to the ground during the move. Failure to follow these instructions may result in the leg support coming loose which may cause serious injury or death.

DO NOT USE THE TRAMPOLINE WHEN THE ENCLOSURE IS REMOVED.

## Care and Maintenance

Failure to follow these instructions to ensure proper operational condition of your trampoline may lead to serious injury or death.

## **WARNING**

- The zipper and buckles should be closed during use to avoid users falling out of the trampoline, as well as during periods of non-use to restrict access by unauthorized users.
- The springs, trampoline legs and enclosure netting must be inspected prior to every use. The legs should be locked securely into place, all the springs attached to the frame and there should be no tears in the enclosure netting. If any part becomes damaged or worn, please stop using the trampoline immediately until this part is replaced with authorized parts.
- If you see any signs of stretched or damaged springs, do not use the trampoline until replacement springs are properly installed. Please contact our customer service representatives to order original replacement parts.
- Please do not use unauthorized parts to assemble the trampoline. This may damage the integrity of the product and can cause injuries during use.
- To move the trampoline, it is recommended for the trampoline to be disassembled and then reassembled in the new location. However, if you need to move the trampoline a short distance for any reason, you must use duct tape or heavy industry tape to tape all leg joints together. To move the trampoline requires two or more people to lift the trampoline from contact with the ground. Do not drag the trampoline along the ground. The trampoline must be kept steady and horizontal to the ground during the move. Failure to follow these instructions may result in the leg support coming loose which may cause serious injury or death.
- The trampoline and enclosure must be stored away during harsh weather conditions including extreme wind, heat and freezing temperatures.
- Always properly store away the trampoline and enclosure when not in use and secure from any unauthorized use.
- Inspect the trampoline before each use and replace any worn, defective or missing parts. The following conditions could represent potential hazards:
  - Missing, improperly positioned or unsecured enclosure support system, frame padding and pole caps
  - Punctures, frays, tears or holes in the trampoline mat or enclosure support system or frame padding
  - Deterioration in the stitching or fabric of the mat, enclosure netting or frame padding
  - Ruptured or loose springs
  - Bent or broken support system (frame)
  - Sagging trampoline mat and/or sagging enclosure netting
  - Sharp protrusions on the support (frame) or suspension system

## **Proper Use Instructions**

Read and understand the use instructions in this manual prior to using this product. Failure to do so can result in serious injury or death.

#### Responsibilities of the user

The key here is to stay in control of your jumps. DO NOT move onto more complicated, more difficult maneuvers until you have mastered the basic, fundamental bounce. Read, understand, and practice all precautions and warnings prior to using the trampoline. A controlled jump is when you land and take off from the same location. For additional tips and instructions, contact a certified trampoline instructor.

#### Supervisor's or owner's role in preventing injuries

It is the responsibility of the supervisor(s) of the trampoline users to provide knowledgeable and mature supervision. They need to know and enforce all the rules and warnings set forth in this manual in order to minimize the likelihood of accidents and injuries and to inform users of these rules. During the periods of time when supervision is unavailable or inadequate, the trampoline should be disassembled and stored in a secure place to prevent unauthorized use. The supervisor is also responsible to ensure that the safety placard is placed on the trampoline and that the jumpers are informed of these warnings and instructions.

## **A** DANGER

### All jumpers need to be supervised, regardless of skill level or age.

- DO NOT attempt or allow somersaults. Landing on the head or neck can cause serious injury, paralysis or death, even when landing in the middle of the mat.
- Do not allow more than one person on the trampoline. Use by more than one person at the same time can result in serious injuries.
- Trampolines over 20 inches (51 cm) tall should not be used by children under six (6) years of age.
- Wear clothing free of drawstrings, hooks, loops or anything that could get caught while using the trampoline/enclosure and result in entanglement or strangulation, or both.
- Climb on and off the trampoline. It is a dangerous practice to jump from the trampoline to the floor or ground when dismounting, or to jump onto the trampoline when mounting. Do not use the trampoline as a springboard to other objects.
- Keep enclosure tightly fastened to the trampoline in accordance with the manufacturer's instructions. Failure to properly assemble and maintain a tight, secure trampoline/enclosure boundary may result in serious injury, strangulation or death.
- Completely close the opening of the enclosure before jumping. Close the opening of the enclosure after using the trampoline.
- Do not use the trampoline while under the influence of alcohol or drugs.
- Do not attempt to jump over the enclosure barrier.
- Do not intentionally rebound off the enclosure barrier.

Read and understand the use instructions in this manual prior to using this product. Failure to do so can result in serious injury or death.

## **WARNING**

- Read all instructions before using the trampoline. Warnings and instructions for the care, maintenance and use of this trampoline are included to promote proper and enjoyable use of this equipment.
- Inspect the trampoline before each use. Make sure the frame padding, enclosure and the enclosure support (frame) padding is correctly and securely positioned. Replace any worn, defective or missing parts before using.
- Use trampoline only with mature, knowledgeable supervision.
- Check for loose cords and gaps. Users may become entangled in or strangled by loose cords or in gaps between trampoline and enclosure.
- Use trampoline only when the surface of the mat is dry. Wind or air movement should be calm to gentle. The trampoline must not be used in gusty or severe winds.
- Keep objects away which could interfere with the jumper. Maintain a clear area under, above, and around the trampoline.
- Do not attempt to crawl under the barrier.
- Do not hang from, kick, cut or climb on the barrier.
- Do not attach anything to the barrier that is not a manufacturer-approved accessory or part of the enclosure system.
- Enter and exit the enclosure only at the enclosure door.
- Learn fundamental bounces and body positions thoroughly before trying more advanced skills. A variety of trampoline activities can be carried out by performing the basic fundamentals in various series and combinations, performing one fundamental after another, with or without feet bounces between them.
- Stop bounce by flexing knees as feet come into contact with the trampoline mat. Learn this skill before attempting others.
- Avoid bouncing too high. Stay low until bounce control and repeated landing in the center of the trampoline can be accomplished. Control is more important than height while keeping the head erect, focus eyes on the trampoline toward the perimeter. This will help control the bounce.
- Avoid bouncing when tired. Keep turns short.
- Limit the time of continuous usage. Make regular stops. Do not jump when tired.
- Properly secure the trampoline when not in use. Protect it against unauthorized use. If a trampoline ladder is used, the supervisor should remove it from the trampoline when leaving the area to prevent unsupervised access by children under six (6) years of age.
- For information concerning skill training, contact a certified trampoline instructor.
- For additional information concerning the trampoline equipment, contact the manufacturer.

## Learning the fundamental trampoline skills

The following lessons are suggested for you to learn basic steps and bounces. Before using the trampoline, you should read and understand all warnings. A complete discussion and demonstration of body mechanics and trampoline guidelines should occur between the supervisor and student as well. The bounces are diagrammed on the following page.

### Lesson 1

- A. Mounting and Dismounting Demonstration of proper techniques
- B. The Basic Bounce Demonstration and practice
- C. Braking (Check the Bounce Demonstration) and practice. Learn to brake on command
- D. Hands and Knees Bounce Demonstration and practice. Stress should be on four-point landing and alignment

### Lesson 2

- A. Review and practice of techniques learned in Lesson 1
- B. Knee Bounce Demonstration and practice. Learn the basic down to knee and back up before trying half twist to left and right
- C. Seat Bounce Demonstration and practice. Learn basic seat bounce then add a knee bounce, hands and knees repeat

### Lesson 3

- A. Review and practice skills and techniques learned in previous lessons
- B. Front Drop To avoid mat burns and teach the front bounce position, all students should be requested to assume the prone position (face down on the ground) while the instructor checks for faulty positions that could cause injury
- C. Start with a Hands and Knees bounce and then extend body into prone position and on the mat and return to feet
- D. Practice Routine Hands and Knees Bounce, Front Bounce, return to feet, Seat Bounce, return to feet

### Lesson 4

- A. Review and practice skills and techniques learned in previous lessons
- B. Half Turn
  - i. Start from front drop position and as you make contact with mat, push off with arms in either the right or left direction and turn head and shoulders in same direction
  - ii. During turn, be sure to keep back parallel to mat and head up
  - iii. After completing turn, land in the Front Drop position

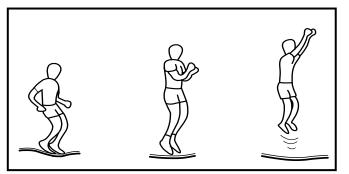

After completing this lesson, the student now has a basic foundation of trampoline bounces. Jumpers should be encouraged to try and develop their own routines with the emphasis on control and form.

A game that can be played in order to encourage students to try developing routines is "BOUNCE". In this game, players count off from 1 to X. Player one starts with a maneuver. Player two has to do Player one's maneuver and add on another. Each player must do the routine properly in the correct sequence. The first person to miss receives the letter "B". This continues until someone spells out the word "BOUNCE". The last remaining contestant is deemed the winner! Even when playing this game, it is important to perform your routines under control and not try difficult or highly skilled bounces that you have not yet mastered.

A certified trampoline instructor should be contacted to further develop your trampoline skills.

## **BASIC TRAMPOLINE BOUNCES**

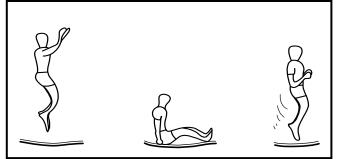

## THE BASIC BOUNCE

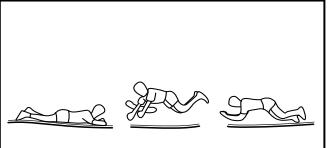

## THE KNEE BOUNCE

## THE SEAT BOUNCE

## THE 180 DEGREE BOUNCE

- 1. Start from the standing position, with your feet having shoulder width apart and with head up and eyes on mat
- 2. Swing arms forward and up in a circular motion
- 3. Bring feet together while in mid-air and point toes downwards.
- 4. Keep the feet shoulder width apart when landing on mat
- 1. Start with the basic bounce and keep it low
- 2. Land on knees while keeping your back straight and body erect while using your arms to maintain balance
- 3. Bounce back to basic bounce position by swinging arms up
- 1. Land in a flat sitting position
- 2. Place hands on mat besides hips, but do not lock your elbow
- 3. Return to erect position by pushing with hands
- 1. Start with the Front Bounce position
- 2. Push off with left or right hands and arms (depending on which way you wish to turn)
- Maintain head and shoulders in the same direction while keeping your back parallel to the mat and your head up
- 4. Land in the Prone position and return to standing position

## **Product Warranty**

Dyaco Canada Inc. warrants this unit, to the original purchaser, to be free from defects in material and workmanship for the period of time listed below. Warranty time begins at the time of purchase. Normal wear and user's abuse are not covered in the warranty. Weather damage and other such acts of nature are not covered by the Manufacturer's warranty. Commercial use and/or transfer of ownership voids the warranty.

#### Trampoline

### LIABILITY

While every attempt is made to embody the highest degree of safety in all equipment we cannot, however, guarantee freedom from injury. The user assumes all risk of injury due to use. All merchandise is sold on this condition, that no representative of the Company can waive or change. This equipment is intended for residential use only. This equipment is not to be used in places of public assembly such as schools, nurseries, day care centre, churches and parks. Dyaco Canada Inc. cannot assume any liability for such use. Any commercial, institutional or public use of this equipment will void the warranty.

PLEASE NOTE: ANY REPAIRS OR REPLACEMENTS MUST BE MADE USING AUTHORIZED ORIGINAL MANUFACTURER PARTS IN ORDER FOR THIS WARRANTY TO BE VALID.

DO NOT RETURN PRODUCT TO THE STORE. PLEASE CONTACT OUR CUSTOMER SERVICE FOR PARTS OR ASSEMBLY INSTRUCTIONS. STORES ARE NOT EQUIPPED TO PROVIDE CUSTOMER SERVICE FOR THIS PRODUCT.

Please visit us online for information about our other brands and products manufactured and distributed by Dyaco Canada Inc.
